Logo system

Primary lockup

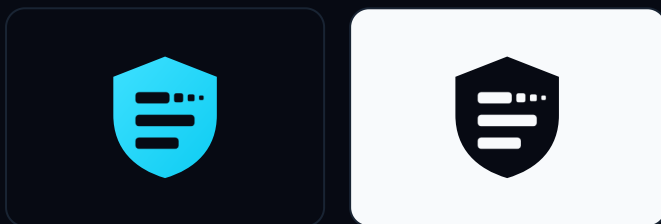

App icon & monogram

Small-size test

Icon

The mark

A shield holding three redaction bars — the top line is dissolving into pixels as sensitive data is erased before it reaches the model. It stays legible at 16 px.

Usage rules

- Clear space around the logo: at least the height of one redaction bar on every side.
- Use the cyan-on-dark version by default; the navy mono version on light backgrounds; the white mono version for single-color contexts (print, embossing, watermarks).
- Never recolor, rotate, stretch, add effects, or place the cyan mark on mid-tone backgrounds.
- Minimum sizes: icon 16 px, horizontal lockup 120 px wide.

Palette

Primary · Cyan
#0DCCF2 · hsl(190 90% 50%)

Cyan Gradient
#3DE0FF → #0DCCF2

Background · Navy
#070A13 · hsl(222 47% 5%)

Card
#0B111E · hsl(222 47% 8%)

Border
#192433 · hsl(216 34% 15%)

Foreground
#F8FAFC · hsl(210 40% 98%)

Muted text
#94A3B8 · hsl(215 20% 65%)

Success
#24C278 · hsl(152 69% 45%)

Destructive
#EF4343 · hsl(0 84% 60%)

Contrast audit (WCAG 2.2)

PAIR	RATIO	RESULT
Foreground #F8FAFC on Background #070A13	18.9 : 1	AAA
Muted #94A3B8 on Background #070A13	7.7 : 1	AAA
Primary #0DCCF2 on Background #070A13	10.3 : 1	AAA
Navy #070A13 on Primary #0DCCF2 (buttons)	10.3 : 1	AAA

Rules

- Cyan is an accent — reserve it for CTAs, links, highlights, and the AI in the wordmark. Never use it for body text blocks or large fills.
- Text on cyan buttons is always navy #070A13, never white.
- Backgrounds stay in the navy family; never pure black (#000).

Type system

DISPLAY — OUTFIT (700/800)

Stop leaks before they reach the model.

BODY — DM SANS (400/500/700)

EraseAI scans prompts, files, and API traffic for PII, credentials, and secrets — then redacts them before they ever leave your browser or backend.

CODE — JETBRAINS MONO (400/500)

POST /api/dev/analyze · "riskScore": 87 · [REDACTED]

Hierarchy

ROLE	FONT	SIZE / WEIGHT
H1 hero	Outfit	48-72px · 800 · -2% tracking
H2 section	Outfit	28-36px · 700
Body	DM Sans	16px · 400 · 1.6 line-height
Caption / label	DM Sans	12-13px · 500-600
Code / data	JetBrains Mono	13-14px · 400

Rules

- Outfit is for headlines and the wordmark only — never body copy.
- Body text never below 16 px on web, 14 px on mobile; captions never below 12 px.
- All fonts are Google Fonts — free for commercial use.

How EraseAI speaks

Confident, precise, protective, plain-spoken. A security engineer who explains clearly — never alarmist, never cute about risk.

HERO HEADLINE

Your prompts are leaking secrets. We catch them first.

ONBOARDING WELCOME

Welcome to EraseAI. Your 7-day free trial starts now — 25 free scans, no credit card. Let's catch your first leak.

ERROR MESSAGE

Scan failed — the file couldn't be read. Your data never left the browser. Try re-uploading or use a different format.

EMPTY STATE

No scans yet. Paste a prompt or upload a file — we'll flag anything sensitive before it goes anywhere.

CALL TO ACTION

Start free trial — 7 days, no credit card

Do/Don't

- **Do** lead with the risk caught and the protection given: "3 leaks blocked."
- **Do** use concrete numbers: "25 free scans", not "generous free tier".
- **Don't** use fear-mongering ("hackers are watching!") or jargon walls (DLP, CASB) in user-facing copy.
- **Don't** blame the user — the tool absorbs the failure ("we couldn't read that file").

Social & export specs

ASSET	SIZE	NOTES
X / Twitter header	1500 × 500	Keep key content 60px from edges
LinkedIn banner	1584 × 396	Left ~400px hidden behind profile photo
Instagram post	1080 × 1080	Centered composition
Instagram story	1080 × 1920	250px top/bottom safe zones
Open Graph image	1200 × 630	Used for link previews
App icon	512 / 1024	Rounded-square container included
Favicon	32 / 16	Icon-only version

Accessibility standards

- All brand text/background pairs meet WCAG 2.2 AA (most meet AAA — see page 3).
- Body text ≥ 16px web / 14px mobile; captions ≥ 12px.
- Interactive elements ≥ 44×44px (iOS) / 48×48dp (Android) — never shrink branded buttons below this.
- Respect [prefers-reduced-motion](#): glow and scan-line animations are decorative and must be removable.
- Never rely on cyan alone to convey state — pair with icons or text (e.g. risk levels use color + label).

Design tokens

Ship-ready CSS custom properties are included in [tokens/tokens.css](#) and already match the product's [index.css](#).
